**INFORMED CONSENT DOCUMENT
FOR TREATMENT OF ADVERSE EVENTS
WITH DRUGS FOR COMPASSIONATE USE**

In observance of Act 41/2002, regulating patient's autonomy and rights and duties concerning information and clinical documents (BOE 15-11-02), we offer you, in writing and in an understandable manner, information about **TREATMENT OF ADVERSE EVENT** called _____, which has not improved with treatments that are usually indicated and approved in these cases, and for which the doctor has recommended treatment with _____ since it is considered the best and most appropriate for me, although there may exist other alternatives, which I had the chance to discuss with the doctor. I am aware that this medication has not been approved for this adverse event and that it may cause some adverse effect not described before, but I accept the risk due to the potential benefit it may have.

I have been correctly informed about this treatment's characteristics: its fundamentals, the manner and details of its execution, its action mechanisms, its immediate effects, the process and evolution of the necessary supplementary treatments to observe in the following days, weeks or months, the cares and precautions to adopt in the following hours or days, the variability of the time necessary to fully recover; therefore, I acknowledge that no guarantee can be given to me as to the date when I can resume my regular activities (emotional, social, work and sports).

I agree to follow all recommendations and perform all control visits as indicated by the doctor. I have also been informed about the possible consequences of not undergoing the recommended treatment.

I ATTEST I have not left out or altered any data when showing my surgical medical history and records, specially those concerning allergies and diseases or personal risks.

The Medical History and results from tests performed on me don't advise against using the appropriate medical procedure when there isn't, a priori, any risks that may have determined the failure of the technique objectively considered.

I RECOGNIZE that, during the treatment, unforeseen conditions may necessitate different procedures than those described above. Therefore, I hereby expressly authorize said procedures, including my transfer to a hospital center. In case of complications during the intervention, I authorize the doctor to request the assistance they deem necessary from other specialists, in their best professional judgment.

However, said information has already been concisely and orally provided to you by the undersigned doctor, who has also addressed all your questions related to the treatment.

I KNOW and ACCEPT the physician's professional training to perform this treatment.

This document is just the graphic transcription of said information to help you understand it and motivate a thoughtful and deliberate authorization.

In _____, on _____,
Patient Name _____
Date of Birth _____ ID _____
Address _____
Town _____
Phone Numbers _____

BRIEF EXPLANATION OF THE TREATMENT:

Complications and risks of this intervention include: _____

Contraindications:

If, during treatment, the healthcare staff was accidentally exposed to my blood, according to the principles of good medical practice, I have been informed of the need to perform the proper analytical determinations on my blood, related to potential pathologies of blood transmission, to adopt the most suitable preventive measures.

I AGREE to do my best to follow the doctor's instructions to the letter before, during and after the treatment mentioned above. I take responsibility for complying with post treatment measures recommended by the doctor, as well as attending control visits suggested by him/her.

I UNDERSTAND that the goal of the treatment is to improve my appearance, with the possibility that some imperfection remains and that the result may not be what I expected. In this sense, I have been informed that the aesthetic result of the treatment depends on factors like how easily you scar, and the formation or non-formation of keloids. I am aware that the medical field is not an exact science, and that absolute perfection cannot be guaranteed. I

understand the result may not be as expected and acknowledge that I haven't been given any guarantee at all.

Medical action might not end in itself, and subsequent treatment action might be necessary to reach the goal you're consenting to.

The cost of the treatment includes several charges for the services provided. The total includes your doctor's fees and the cost of materials, equipment or product. The charges for this procedure don't include possible future costs for additional procedures of your choice, or that you require to review, optimize or complete your result. There may be additional charges due to complications arising from the treatment. Charges for secondary treatments concerning check-ups and charges that haven't been previously arranged will also be your responsibility. By signing the consent for this procedure, you acknowledge you have been informed about its risks and consequences and take responsibility for the medical decisions made, together with the economical costs of any future treatments.

I AUTHORIZE the taking of photographs and videos for an appropriate diagnostic evaluation, and for the control of the assessment and results. I also authorize the taking of photographs of the operated area for scientific, educational or clinical purposes, and I understand that their use is not a violation of privacy or confidentiality, rights to which I am entitled.

I KNOW my data will be treated in an automated manner, which I have authorized after my rights have been explained to me pursuant to the LOPD (Spanish Organic Act on Data Protection) in force: rights of access, rectification, cancellation and objection established by the Act, and after expressing I can address the Clinic in writing, notwithstanding the provisions of Section 8 of the Act about health-related data. With my signature, I give my express consent for my personal data to be handled by the CLINIC for their own purposes.

I am aware that my signature and this consent don't assume any kind of waiver to future claims, both clinical and legal. I am also aware that I can withdraw my signature from this consent at any time prior to the execution of the treatment.

I have clarified any doubts about everything that has been mentioned above, and I fully understand this CONSENT DOCUMENT, standing by each and all of its points; by signing the document, I ratify and consent to the execution of the treatment.
