**INFORMED CONSENT DOCUMENT
FOR BLOOD EXTRACTION FROM SOURCE PATIENT
IN CASE HEALTHCARE STAFF SUFFERS A BIOLOGICAL ACCIDENT**

Dear Mr./Ms. _____,

We need your consent because a healthcare worker has suffered a biological accident (puncture of, or splatter on skin or mucosas, etc., with blood or other potentially infectious body fluids) during the professional development of their jobs, while attending you or handling a technique or procedure.

The Health Center Risks Prevention Service has established measures to quickly take care of workers in case they suffer a biological working incident, and are at risk of being infected by a virus that is transmitted through blood and other body fluids (Hepatitis B virus, Hepatitis C virus, and Human Immunodeficiency Virus/AIDS). To appropriately attend the health worker, it is very important to know if you are carrying any of these viruses or not. That is why we need to extract your blood and analyze if you are a carrier of any of them.

This procedure does not entail any risks to you, only the discomfort associated with blood extraction.

Confidentiality is guaranteed, and results will be reported to you personally, although you can refuse to know them.

This research does not assume any responsibility from you.

STATEMENTS AND SIGNATURES:

Patient, Legal Guardian, Father/Mother or Relative Statement:

The physician, Dr. _____
has satisfactorily explained to me and clarified any and all doubts I had about this matter. I completely understand the explanations provided to me, and thus I give my consent to extract my blood for the purpose described.

I can withdraw this consent at any time I want.

Patient Mr./Ms. _____ ID _____
